## EDUCATION

<b>ShanghaiTech University</b> <i>Candidate for B.E., Computer Science and Technology</i> <ul style="list-style-type: none"><li>GPA: 3.9 / 4.0 (rank 2 / 183)</li><li>Honors: President's Scholarship (2017, 2018), Outstanding Student (2017, 2018)</li><li>Relevant coursework: Computer Architecture III (graduate, A+), Compilers (A+), Parallel Computing (A+)</li></ul>	<i>Sep 2016 - Jul 2020</i> <i>Shanghai, China</i>
<b>Massachusetts Institute of Technology</b> <i>Undergraduate Special Student, Computer Science</i> <ul style="list-style-type: none"><li>Relevant coursework: Computer Networks (graduate), Artificial Intelligence</li></ul>	<i>Sep 2019 - Jun 2020</i> <i>Cambridge, MA, USA</i>

## RESEARCH PROJECTS

<b>Affordable AI: Cheap &amp; Scalable Graph Convolutional Networks Computing Framework with the Aid of Serverless (Lambda) Computing</b> <i>CSST Summer Research Intern, University of California, Los Angeles</i> <ul style="list-style-type: none"><li>Integrated new and emerging <i>serverless computing</i> techniques into traditional graph computing, to build an affordable, efficient, and highly-scalable Graph Convolutional Networks (GCNs) computing platform without expensive dedicated GPUs.</li><li>Implemented the first workable prototype with AWS Lambdas service, and reached linear scalability in GCNs' tensor computation.</li></ul>	<i>Jul 2019 - Present</i> <i>Los Angeles, CA, USA</i>
<b>NcTrace: Optimized Trace Data Storage with the netCDF Format</b> <i>Leader of project team, ShanghaiTech University, L.I.O.N group</i> <ul style="list-style-type: none"><li>Optimized the storage of Comma Separated Values (CSV) trace data using the netCDF I/O library. Introduced the "<i>dimension packing</i>" storage model which reduces file size, meanwhile accelerates users' analysis tasks.</li><li>Tested with Google cluster traces, and achieved 7:1 size reduction with 2 orders of magnitude acceleration on reading.</li></ul>	<i>Mar 2019 - Aug 2019</i> <i>Shanghai, China</i>
<b>Active I/O: High Performance Parallel Content-aware Storage System</b> <i>Research Assistant, ShanghaiTech University, L.I.O.N Group</i> <ul style="list-style-type: none"><li>Designed a high-performance, parallel file system named RosFS. It aims at digging out the "<i>content locality</i>" within highly-structured data formats like Robot Operating System (ROS) bags and Visual Molecular Dynamics (VMD) molecules.</li><li>Tested with ROS bag files, and achieved 6.5x performance improvement on opening and at least 1.4x on reading.</li></ul>	<i>Jan 2019 - Aug 2019</i> <i>Shanghai, China</i>

## TEACHING EXPERIENCE

<b>Teaching Assistant in Computer Architecture</b> <i>School of Information Science and Technology, ShanghaiTech University</i>	<i>Feb 2019 - Apr 2019</i> <i>Shanghai, China</i>
<b>Teaching Assistant in Operating Systems</b> <i>School of Information Science and Technology, ShanghaiTech University</i> <ul style="list-style-type: none"><li>Guided course projects on the <i>Pintos</i> system kernel from Stanford CS140.</li></ul>	<i>Sep 2018 - Jan 2019</i> <i>Shanghai, China</i>
<b>Teaching Assistant in Discrete Mathematics</b> <i>School of Information Science and Technology, ShanghaiTech University</i>	<i>Mar 2018 - Jul 2018</i> <i>Shanghai, China</i>

## PATENTS

- Yin, S. and Hu, G. 2019. *A Storage System Management Policy Based on Data Content Locality*. CN. Patent Application 201910499391.9, filed in June 2019. Patent Pending.

## AWARDS

- Second Class Prize, ASC Supercomputing Cluster Competition 2019 (team leader) *Mar 2019*
- Outstanding Teaching Assistant Award, School of Information Science and Technology *Jan 2019*
- Meritorious Winner, Mathematical Contest in Modeling (MCM) 2018 *Apr 2018*

## MISCELLANEOUS

- Skills:** System programming, C/C++, Python, Rust, Linux servers, MIPS
- Languages:** English (fluent), Chinese (native)
